Fund Manager Views

- ▶ The Q3FY24 results season is underway. Profit growth was strongest for oil, PSUs, construction materials, public sector banks and autos, while technology reported a decline in profit. Materials, consumer discretionary and energy led the beats vs. analysts /market expectations, while utilities missed the most. Margins expanded the most for materials, while financials reported the highest contraction.
- ▶ Markets showed how volatility could play out and corrections are periods when one should remain invested. A rotation to large-caps may be imminent and some caution in mid-caps is warranted bringing us to the important aspect that's valuations. Currently, valuations in India are expensive relative to the Asian peers and India remains the most expensive market (on both forward P/E and trailing P/B basis).
- ▶ We have always suggested to our investors to stay invested in the markets and use the bouts of volatility as opportunities to increase exposure to the markets. Patience is the biggest reward to long-term investors.
- ▶ Domestic stories are prime focus for us. Credit growth story has remained strong for India over long term.
